Acknowledgements	ii
Abstract	ix

Chapter 1: Introduction

1.1. Goal	1
1.2. Outline	4

Chapter 2: Surface and Inverse Scope

2.1. Introduction	8
2.2. Differences between surface and inverse scope readings	10
2.2.1. Specificity effects	10
2.2.2. Freezing effects	20
2.2.2.1. Freezing effects on scope	20
2.2.2.2. Freezing effects on binding	27
2.2.3. Scope minimizing effects on negation	34
2.3. Summary	43

Chapter 3: Two Sources of Scope Interaction

3.1. Introduction	45
3.2. Surface scope readings may emerge through LF compositional computation while inverse scope readings do not.	47
3.2.1. CM-comparatives	48
3.2.2. Covert and overt mismatch	66
3.3. Two sources of wide scope readings, (i) LF compositional computation and (ii) MINOR, an extra-grammatical operation	71
3.4. Surface scope readings involving MINOR	72
3.5. On MINOR	79
3.5.1. Properties of MINOR	80
3.5.2. Speculative remarks	82
3.5.3. Can MINOR be considered as Predication in the sense of Kuroda 1992:Ch.1?	84
3.6. Summary and further remarks	89

Chapter 4: Isomorphism Principle

4.1. Introduction	93
4.2. Between a QP and a referential expression	95

4.2.1. Experimental design	95
4.2.2. Evidence for isomorphism principle	99
4.3. Between a QP and an adnominal 'focus-sensitive' particle	108
4.3.1. Experimental design	108
4.3.1.1. Two types of adnominal 'focus-sensitive' particles	109
4.3.1.2. Theoretical assumptions	115
4.3.1.2.a. NP-external FPs	116
4.3.1.2.b. NP-internal FPs	125
4.3.1.3. Experimental design	128
4.3.2. Evidence for isomorphism principle	130
4.4. Summary and additional remarks	141

Chapter 5. Functional and Pair-List Readings

5.1. Introduction	144
5.2. Functional readings may emerge through LF compositional computation, while pair-list readings must be due to MINOR	145
5.2.1. Presence or absence of specificity effects	147
5.2.2. Presence or absence of freezing effects	154
5.2.3. Presence or absence of scope minimizing effects on negation	162
5.2.4. Summary	168
5.3. Predictions and confirmation	169
5.3.1. CM-comparative	169
5.3.2. Domain restriction	180
5.3.3. Single occurrence	182
5.4. Implications on the current debate regarding the status of pair-list readings .	187
5.5. Summary and further remarks	190

Appendix: On Some Current Proposals

A.1. Introduction	198
A.2. Remarks on Beghelli & Stowell 1997	198
A.3. Remarks on Reinhart 1997	204
A.3.1. The choice function analysis	204
A.3.2. Differences between the choice function analysis and MINOR	208
A.3.3. Do we really need the choice function analysis?	209
